

Canada in a Changing Climate: National Issues Report

ECOSYSTEM SERVICES

This chapter examines the important role that ecosystems play in adaptation, and how the services that we derive from them are threatened by climate change.

Climate change is threatening Canada's ecosystems and the services they provide

Impacts will vary across Canada's ecosystems and regions

Indigenous Knowledge is vital to maintaining ecosystems

Nature-based approaches to adaptation maximize benefits

Explore the Ecosystem Services chapter, one of nine chapters from the *Canada in a Changing Climate: National Issues Report* of the national knowledge assessment on climate change impacts and adaptation, by visiting this link:
